- teething biscuit, or massage the gums with your clean fnger. If nothing else helps, try a dose of Tylenol or Motrin. Avoid numbing creams—they are easily overdosed.
- If you become overwhelmed, put your baby in a safe place and take a break or get some help.
- Your baby may fuss before falling asleep. Try to put them down while drowsy for naps and at bedtime, so they learn to fall asleep by themselves. Adhere to a bedtime routine.
- Babies make noises sometimes during light sleep. Your baby may not actually be awake if they just whine or moan. Give them a few minutes to see how alert they are. Try to comfort them without picking them up.
- For advice on sleep issues, read Guide to Your Child's Sleep from the AAP, Solve Your Child's Sleep Problems by Richard Ferber, or consult www.healthychildren.org.

## **Nine Month Visit**

We will record your baby's height, weight, and head size. Measurements do not have to be 50th percentile to be "normal." Your baby's growth typically will start slowing down now.

## Let your doctor know today if...

- Your baby does not use both arms and both legs equally.
- Your baby does not sit well or does not stand holding on.
- Your baby does not handle toys.
- Your baby does not laugh or babble.
- Your baby avoids eye contact.
- Your baby wakes at night and needs help to get back to sleep.
- You are worried about your baby's growth, development, or behavior.
- You are feeling overwhelmed or sad about the baby or unable to enjoy being with the baby.
- You have a particular concern that is always on your mind.
- Your baby spends time in a building built before 1960 that
  has peeling paint or that is or was renovated, or your child is
  around someone who has lead poisoning or who works
  with lead.

## Your next visit

At the twelve month visit your doctor may...

- · Check your child's growth.
- Discuss vaccines: MMR, chicken pox, Hepatitis A, infuenza (seasonal) and COVID. Information about these can be found at: www.cdc.gov/vaccines.
- Please note the 12 month well visit needs to be scheduled on or shortly after your child's birthday (not before).
